

BDD Tests For Website

- 1) As a User I would like to view different gender of clothes in their own sections so that I can quickly access what I need to.

Scenario:

Given the User is on the main page, when they click on one of the two buttons with links on the images , 'Shop Mens' or 'Shop Womens' they will be directed to their chosen page.

Given the User is on any page of the website, when they hover over Clothing on the navigation bar they will see two dropdown links 'Mens' and 'Womens'. When they click on either of these two they will be directed to their chosen pages.

- 2) As a User I would like to be able to contact the company so that I can get the required help depending on my issue.

Scenario:

Given the User is on one of the websites pages, when they click on the Contact link from the navigation bar they will be directed to a page consisting of a form. Then they can fill out the form by filling the text fields and press the send button which will send their enquiry to the company.

- 3) As a User I would like to be able to review my basket so that I can remove an item if I no longer want it.

Scenario:

Given the User is on the basket page, they will be able to view the items added to the basket and if they decide they no longer want the item they can click the 'Remove' button beside the item.
